

ARSHAL

Noida, India | +91-8630811634 | arshal.real@outlook.com | linkedin.com/in/arshalsaifi | github.com/MeowMan007 | [Portfolio](#)

PROFESSIONAL SUMMARY

B.Tech Computer Science (AI & ML) graduate with hands-on experience across the full stack — building REST APIs and backend services with Python and FastAPI, responsive UIs with React.js, and SQL/NoSQL-backed data pipelines, alongside growing expertise in LLM-powered GenAI systems (LangChain, LangGraph, RAG). Built automation and reporting pipelines during an internship that cut turnaround by over 90%. Strong foundation in Data Structures & Algorithms (400+ problems solved); seeking an SDE / Python Developer / AI Engineer role.

EDUCATION

B.Tech, Computer Science (AI & ML) — 2022 – 2026

Noida Institute of Engineering & Technology, Noida | CGPA: 7.29 / 10

Class XII (CBSE) — 2021 – 2022

Dewan Public School, Hapur | 71%

TECHNICAL SKILLS

Languages & CS Core: Python | JavaScript | Java | SQL | DSA | OOP

Backend: FastAPI | Node.js | REST APIs | JWT Auth | Pydantic

Frontend: React.js | Vite

Databases & Data Analysis: MySQL | MongoDB | Pandas | NumPy | Matplotlib | Seaborn | EDA

AI & Generative AI: PyTorch | LangChain | LangGraph | PydanticAI | RAG | Vision Transformers (ViT)

Tools: Docker | Git/GitHub | Jupyter Notebook

INTERNSHIP EXPERIENCE

Python Engineer Intern — Sparkx Automations — Oct 2025 – Mar 2026

- Engineered Python ETL pipelines with Pandas, NumPy, and SQL, automating manual data preprocessing workflows and cutting reporting turnaround from 2 days to under 1 hour (90%+ reduction).
- Authored SQL queries to extract, join, and aggregate data across internal relational databases, powering weekly operational reporting.
- Developed FastAPI endpoints exposing automation scripts as on-demand backend services, and built a LangChain-based NLP text classifier, cutting manual lead-triage effort by ~50%.
- Debugged and resolved issues across 3 legacy production scripts, adding error handling and modular structure to improve pipeline reliability.

PROJECTS

AccessLens — AI-Powered Web Accessibility Audit Tool ([GitHub](#))

Tech Stack: Python | PyTorch | Vision Transformer (ViT-B/16) | Hugging Face | FastAPI | React | Docker

- Built a hybrid computer-vision accessibility auditor combining rule-based WCAG 2.1 checks with a fine-tuned Vision Transformer (ViT-B/16), catching visual issues rule-based scanners miss.
- Designed a FastAPI backend with Selenium-based page capture and Grad-CAM explainability for automated PDF reporting, containerized with Docker and deployed on Hugging Face Spaces.

Placidus AI — Astrology Birth Chart Calculator & AI Astrologer ([GitHub](#))

Tech Stack: Node.js | Express | JavaScript | Hugging Face API | SVG | Vercel

- Built a high-precision astrology birth-chart engine in Node.js with a dynamic interactive SVG chart-wheel visualizer, calculating planetary longitudes, Placidus house cusps, and a 5-point aspect matrix, deployed on Vercel.
- Engineered an LLM-powered astrological counseling agent using the Hugging Face API (Qwen2.5-72B, Mistral-7B, Llama-3), with a system-prompt-driven interpretation engine synthesizing sect analysis and chart-ruler insights.

DentDost — AI-Powered Scheduling Agent ([GitHub](#))

Tech Stack: Python | FastAPI | PydanticAI | LangGraph | React.js | Vite

- Built a Vite + React.js frontend consuming the FastAPI backend over streaming REST APIs, delivering a real-time conversational booking experience.
- Engineered a multi-agent conversational booking system with PydanticAI, using prompt engineering and ReAct-style tool-calling to convert natural-language requests into confirmed Google Calendar bookings.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ DSA problems (arrays, trees, graphs, dynamic programming) on LeetCode, Codeforces, and HackerRank; ranked in the top 10% of college coding competitions.
- Completed 14+ certifications in Generative AI, LLM Development, RAG, Data Analytics, and Frontend Development (React) from Coursera, DeepLearning.AI, and IBM; active open-source contributor with pinned GenAI and React repos.
